

## PRESS RELEASE

### **Venture Energy delivers Hong Kong's largest ever green bunkering in partnership with Sinopec Hong Kong**

**Hong Kong S.A.R., China | 9 July 2026 - Venture Energy Limited** ("Venture Energy") recently facilitated the supply of 1,000 tonnes of green methanol by the bunkering vessel *Da Qing 268*, which is managed by Wah Kwong Ship Management, to a RoRo vessel *CM Shenzhen* belonging to **China Merchants Guangzhou RoRo Shipping Co., Ltd. ("CM RoRo")**, with **Sinopec (Hong Kong) Limited (Sinopec HK)**, marking the **largest single green methanol bunkering operation conducted in Hong Kong to date**. The operation utilised green methanol from **Shanghai Shenji Energy & Environmental Technology Co., Ltd. ("Shenji Energy")**, a subsidiary of Shenergy Group.

This milestone highlights Venture Energy's supply capabilities to bridge growing demand in the Greater Bay Area with diversified supply sources across North and East China, contributing to the development of a reliable and scalable green marine fuel supply chain for the region. Through close collaboration with Sinopec HK and other industry partners, Venture Energy helped ensure the safe and efficient delivery of green methanol to Hong Kong's bunkering market.

The successful operation further strengthens Hong Kong's position as an international maritime centre and an emerging green fuel bunkering hub. It also demonstrates the Greater Bay Area's potential to establish a competitive, integrated and sustainable marine fuel ecosystem covering production, logistics, storage, bunkering and end-use applications.

Venture Energy will continue to collaborate with strategic partners across the green fuel value chain to support future bunkering operations and contribute to the development of low-carbon maritime solutions.

-END-

### **About Venture Energy**

Venture Energy's vision is to be a leading provider of next generation fuels. We develop plant and infrastructure projects to drive marine decarbonisation across Asia and the world.

Together with local partners, we invest in upstream clean fuel production capacity, offering development, sales, marketing, and logistics services to plant consortia, and a reliable project partner to off-takers, particularly of methanol and ammonia. We offer our international partners unparalleled visibility of and seamless access to the Chinese renewables market, and our Chinese partners an effortless international reach.

Venture Energy is a subsidiary of Wah Kwong, a privately-held integrated shipping group headquartered in Hong Kong with more than 70-year history, involved in ship owning, ship management, marine consultancy services and dry bulk operating.

### **About Sinopec HK**

Established in 1989, Sinopec (Hong Kong) Limited is Hong Kong's leading oil, LPG, and aviation fuel supplier, serving as the Sinopec Group's downstream international investment platform. The company operates 2 oil depots, 54 service stations, and a tanker fleet, while expanding its retail and aviation refueling network across more than 10 countries, including Singapore, Australia, and Thailand.

Aligning with "Dual Carbon" goals, the company is accelerating its green transition. It built Hong Kong's first hydrogen refueling station, is developing a solar-powered green hydrogen project, has deployed over 200 EV charging piles, and regularly supplies sustainable aviation and marine biofuels.

Driven by its vision to become a "leading integrated oil and gas service provider in the Asia-Pacific," Sinopec Hong Kong continues to focus on green transformation and global expansion to power regional economic growth.
